

SUCCESSFUL THRU-TUBING CERAMIC SAND SCREEN INSTALLATION FOR PCSB SARAWAK GAS

Once again, Neural Oilfield Service has successfully performed retrieval of Thru-tubing Plasma Coated Ceramic Sand Screen prior change-out. This screen was installed in 7" gas producer back in August 2021 via slickline conveyance. The two joints of 15 feet of 3-1/2" screen were successfully retrieved after being installed for nearly 3 years. Overall, smooth screen retrieval was achieved and screen coating as well as physical are still in good condition. All in all, job was efficiently conducted in safe and sound condition.

Kudos team, another successful milestone achieved!
